MACRO

Moldova in 2018: making investment work for people and public good

ANNUAL INTERNATIONAL CONFERENCE, 6TH EDITION

19 October, 2018

Chișinău, Republic of Moldova
MACRO: WHAT IS IT ABOUT?

“MACRO” stands for “Moldova: Assessing Country Risks and Opportunities”. MACRO has been conceived as an annual event bringing together domestic and international policy experts and thinkers with the key purpose of discussing and advancing innovative ideas to support Moldova along its way of economic development and modernization.

The annual Conference offers a high-level intellectual platform to dissect the factors influencing Moldova's attractiveness as destination for international investments, new ideas and advanced technologies, to assess the country’s risks that need to be alleviated to make Moldova a better place for the capital and the labour and to identify the opportunities to harness in order to foster Moldova’s economic development and competitiveness.

The MACRO Annual International Conference will not be approached as a stand-alone event, but rather as a logical component of the "Moldova 2018: State of the Country Report" process. MACRO will serve as a nation-wide platform for public debates among authorities, local businesses, civil society and international community in elaboration of policies and prioritization of the key public sectors, which need assistance for further development.

GOALS OF THE CONFERENCE

The goal of the 6th edition of MACRO Annual International Conference is to discuss the role of private and public investment in the Moldovan economic development while ensuring respect for rights at work in order to achieve sustainable and inclusive economic growth. The conference will be composed of two interconnected panels. The first panel will discuss the state of the national economy, including recent trends and outlook, as well as the extent to which investments, both private and public, could lead to systemic economic and social transformations of the country. The conference will focus also on public investments and related corruption risks and possible political clientelism in the run-up to the parliamentary elections, as well as on the opportunities to increase effectiveness of such investments.

The second panel will focus on private investments: key bottlenecks and opportunities to unleash the investment potential of Moldova and increase the spill-over effects for the entire society. The “Moldova 2018 State of the Country Report” findings that will be presented at the conference will provide intellectual stirring and analytical support for the discussions.

Friedrich-Ebert-Stiftung (FES) is a German political social-democratic foundation which aims at promoting democracy, peace, international understanding and cooperation. FES fulfills its mandate in the spirit of social democracy and devotes itself to public debates finding social-democratic solutions to current and future issues of the society.

FES IN MOLDOVA

In the Republic of Moldova, FES aims at fostering European integration, democracy, peace and social justice through political dialogue, education and research. Our main areas of activity are the following:

DEMOCRATIZATION AND POLITICAL PARTICIPATION

Moldova faces the challenge of consolidating its democratic institutions and developing a democratic culture that brings the country fully in line with standards of the European Union. FES contributes to this process by promoting political participation in civil society organizations, political parties and local self-governing bodies. A particular focus of FES activities in this area is on empowering citizens in the regions. Citizens need to be empowered to be able to critically follow public debate, monitor political stakeholders, articulate their views, and act on behalf of their interests. Therefore FES has engaged activities to promote participatory democracy and an enhanced citizens’ civic and political culture on the local level.

EUROPEAN INTEGRATION

Moldova is part of the European Neighbourhood Policy and the Eastern Partnership. FES supports the European Integration Process of the country. Through a series of instruments such as radio debates, news bulletins, policy papers, publications and conferences FES focuses on the main challenges related to the European Integration process, facilitating the access of the public to up-to-date and reliable information on the topic, improving the dialogue between the civil society and decision makers on the requirements for successful European Integration, and contributing to strengthening the European integration efforts of Moldovan authorities. Additionally, FES supports non-governmental organizations in contributing to a peaceful resolution of the Transnistrian conflict as a prerequisite for successful European Integration in the long-run.

ECONOMIC, SOCIAL AND ENVIRONMENTAL POLICY

In this area the FES supports its partners in developing and implementing policies for a functioning market economy which is sustainable, socially balanced and able to address the needs of all citizens. Input and projects in the area focus on topics such as reforming social security systems, improving working conditions and labour market opportunities and fostering sustainable development. Additionally, FES runs programs which aim at promoting Social Democratic values.
